

Series

VENTS Boost 150-250

Series

VENTS Boost 355-400

Inline fans in a polymer casing with the air flow of up to **3350 m³/h**

Application

The units are intended for supply, exhaust and supply and exhaust ventilation systems requiring a powerful air flow: commercial, office and other public or industrial premises as well as rooms with high humidity. The fans are compatible with Ø 150, 160, 200, 250, 355 and 400 mm air ducts.

Design

The casing is made of polymer (for models 355 and 400, the casing is additionally reinforced with a metal

housing). Due to the conically-shaped polymer impeller with specially profiled blades the air stream circular velocity increases, which results in higher air flow and pressure as compared to characteristics of standard axial fans.

The specially designed diffuser, impeller and airflow rectifier at the fan outlet provide smooth air flow distribution and enable the best combination of high air flow, increased pressure and low noise. The fan casing is equipped with an airtight terminal box for connection to power mains.

Motor

The VENTS Boost fans are equipped with single-phase high-efficiency three-speed asynchronous motors with low power consumption.

The motor is equipped with thermal switches for overheating protection.

The ball bearings ensure a long service life (about 40 000 hours of continuous operation). The motor ingress protection rating is IPX4.

Speed control

The three-speed motor can be controlled using a built-in switch (option V) or an external switch P3-5.0 (purchased separately).

Mounting

The fans can be mounted at any place and at any angle within the ductwork system. Several fans can be installed in one system in parallel to attain higher air flow or in series to increase operating pressure in the system. The fan casing is equipped with fixing brackets for floor, wall or ceiling mounting.

The fans can be mounted using KM-Boost brackets of the appropriate size (purchased separately, available for 355 and 400 models).

Overall dimensions

Model	Dimensions [mm]			
	A	Ø D	D1	H
Boost 150	301	149	247	267
Boost 200	302	199	293	308
Boost 250	293	249	327	342
Boost 355	388	350	390	450
Boost 400	388	395	441	500

Overall dimensions of brackets

Model	Dimensions [mm]				
	A	A1	H	H1	B
KM-Boost 355	506	567	213	204	180
KM-Boost 400	563	624	235	228	180
